

## New: PLATON *ti*

The proven system for proximal femoral neck fractures

- *now of titanium* -

### Features

#### Nail

- slim distal diameter of 10 mm (rather than 11 mm of the steel nail)
- proven proximal diameter of 17.5 mm (unchanged)
- distal locking screws  $\varnothing$  5 mm (rather than 6.2 mm)
- Lengths:  
Standard nails: 190 mm,  
long nails: from 320 mm initially
- stronger bending of the long nails:  
antecurvature radius 1.5 m (steel nail with 2.4 m)
- CCD angles: 125° and 130°

#### Lag screws

- high rating due to 12 mm diameter
- rotating assurance and glide path limiting through longitudinal grooves
- improved positioning tolerance through conic thread coating

#### Antirootation Clip

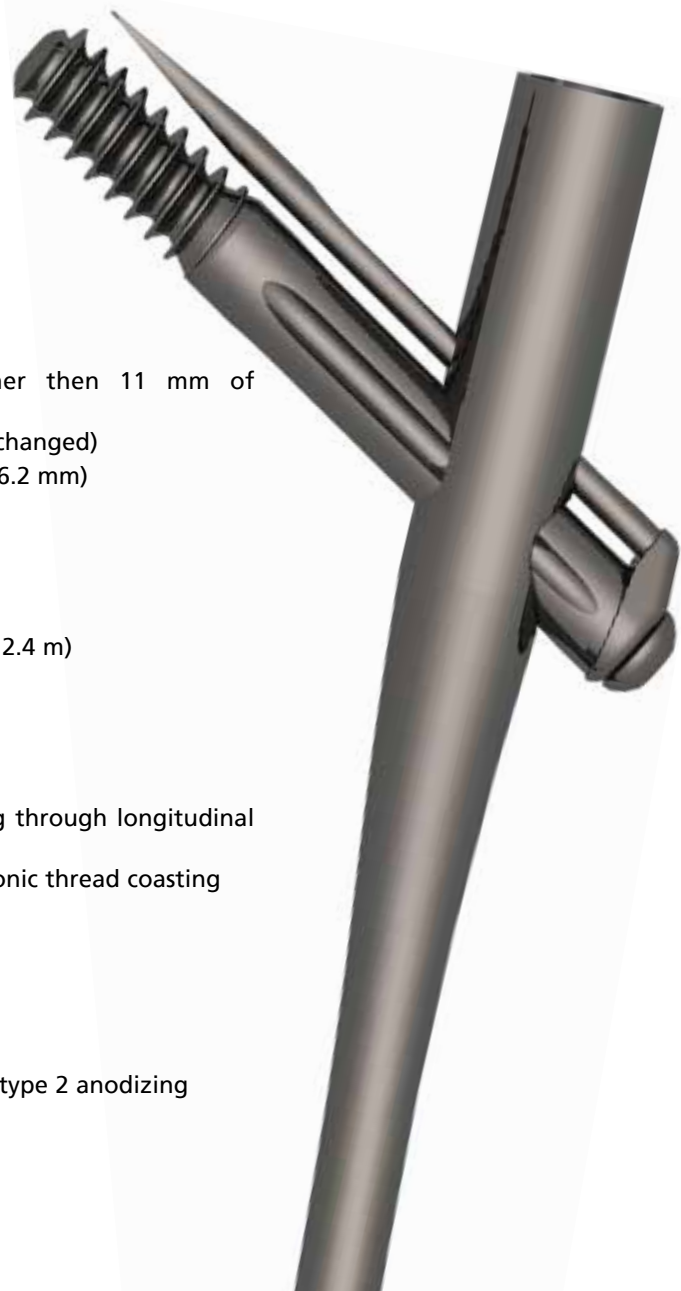

- additional groove for glide path limitation

#### Surface

- Improved wear and tear resistance due to type 2 anodizing

#### Material

- Titanium (Ti6Al4V)

Available shortly, please contact our Customer Service.

## PLATON *ti* components

PLATON *ti* Lag screw

	item no.	item no.
Size	non sterile	sterile
